# THE MANY NEW DIMENSIONS OF ZAXXON.

The first game to put video display in perspective also puts excitement, challenge and skill into a new dimension.

## New Excitement

The vivid color and detail of ZAXXON's playfield provides a totally unique graphic presentation which simulates a 3-dimensional-like effect. Zaxxon looks and sounds like actual aircraft flight, and players can soar to new levels of video entertainment. Operating a newly designed and field-tested control stick with pistol grip and trigger firing action, the player guides his ship just like a real fighter pilot. Diving, banking, flying left and right, the player ship appears larger or smaller depending on its altitude. The player ship even has a shadow which follows its every move. And Zaxxon has the fantastic new

sound of *space wind*, so the player feels the thrill of flight like never before.

## New Challenge and Skill

And what an enemy the player faces. First, the heavily armed *floating fortress* must be navigated, dodging walls, strafing fuel tanks for extra fuel, and avoiding fire from missiles and gunnery. It's a dazzling journey to score points, to replenish the player's fuel supply, and to earn bonus ships.

Surviving the enemy barrage over the fortress brings the player up against the enemy *fighter fleet*. Destroying these aggressor ships is an artful battle of skill and depth perception because the player ship must be at the enemy's altitude when he fires to score a hit. Once the player has survived the enemy

dogfight he confronts a new battle within the *enemy headquarters*. This is a more heavily defended fortress of tighter passages armed with laser barriers and increasingly heavy firepower to engage the player.

That test successfully passed, the player must defend against the enemy's deadly *armored robot* and homing missile. It is a blazing battle to the finish until the player scores six hits on the missile, or until the robot destroys the player ship. Succeeding rounds increase in difficulty to heighten player challenge.

Upright: 72 1/4" high, 29 1/4" deep, 25 1/2" wide, 330 lbs.

# ZAXXON™

The thrill of Zaxxon begins with the player ship invading the enemy fortress.

Rounds become progressively more difficult and exciting as the player ship must navigate between laser barriers and fortress walls.

The player ship can score by destroying missiles, enemy ships, gunnery and radar towers.

The ultimate test of every player's skill, the blazing confrontation against the enemy robot challenges players to keep on playing.

A newly designed and field-tested flight control stick with pistol grip and trigger firing action gives Zaxxon players the feeling of an actual fighter pilot in combat action.
