Description of the game: Your goal is to master Donald's explosive temper in a hilarious, cartoon-like, action-packed 3D game. It will be coming on all existing platforms (GBC, PSX, PS2, N64, DC and PC) in November 2000.

Key points:

Throughout the development, the main concern has been to *capture the essence of what makes Donald* so unique. We did not want to make a game with Donald but *a Donald-like game*.

1. *For the 1st time ever*, the world's most recognisable duck appears *in 3D*
    -   You will have the impression that you are playing in a *Donald cartoon* (graphics, sound and design), featuring many *well known characters*: Daisy, the Nephews, Gyro Gear Loose, the Beagle Boys, Magica De Spell…
    -   Donald actually has his original, *unmistakable voice (on all platforms but Game Boy Color)*
2. *Hilarious gameplay and crazy mini-games*
    -   *Unique gameplay: The mood system* captures the essence of Donald's explosive personality. Donald always starts his day in a good mood in his cartoons or comics, and likewise Donald here starts a level in a happy mood. But as always, things won't go as planned. When he gets hit by an enemy, he goes berserk, calms down and then stays angry.
    -   As he travels through the game, he will confront *wacky enemies* and obstacles
    -   You will also be able to collect outfits for Donald to show off.
    -   In the PS2, to impress his Nephews, Donald has to master funky *special moves* like the the Yoga bound…
3. *Heart pounding action*
    -   The *rhythm of gameplay* is so fast-paced that it will leave you out of breath. Donald is always in a situation where he has to run, jump or attack. You never have time to rest!
    -   The challenge is even greater when you enter the *chase maps* or the *time attack* ones.
    -   Addictive beat your own high-score challenges

This is really a game for all those looking for immediate fun – be it kids or adults.
