

# SEGA *Starlet*

# THE SEGA STARLET

## “Economy Plus”

---

How can Sega offer the Starlet priced so right?  
(Before you guess, please read these 5 sneaky\* clues)

1

The Starlet is a down to earth standard slot machine, offering no frills, a machine that eliminates player confusion over odd payouts.

2

While all extras have been removed the mechanism is the same guaranteed, long life, Sega mechanism. All parts are nickel plated with a heavy copper base; coin entry and money bowl are Hard Chrome plated; coin chute and clock are Sega's usual high standard.

3

The light box has been removed giving the cabinet the new low look, while allowing a parts savings.

4

A new paint styling has removed the white band down the center which allows us to bake the paint to a higher temperature giving a harder Hammernet finish; easy to wipe off, easy to keep clean, with a savings in painting costs.

5

A new sand casting has replaced the lower die casting, this in turn eliminates some lighting requirements, however not affecting the reel window and reward glass lighting.

\* Sneaky that is because your reading these clues gives us a chance to point out the merits of the STARLET.
