

Dreamcast

★ THIS IS A 128 BIT WAR ★

DREAMCAST NOID

DREAMCAST NOID

In an alternative past where a devastated videogame industry takes place, a company is fighting for its survival as a hardware manufacturer. Enemy hordes have already conquered all territories and there's only a little ancient peripheral left to strike back against the effects of mass distribution fueled by the force of filthy lucre.

Put an end to the competition in all its shapes and forms in order to unveil the harsh reality. Do it using as few weapons as possible to be honored and awarded as a true hero of fair causes.

★ Finish the game to unlock the EXTRA GAME mode, featuring pixel art graphics which pay homage to past games from the same genre.

★ Although you have an infinite supply of balls, try to keep their use as minimal as possible.

★ Try to beat your high scores with or without the use of cheats. Challenge your own limits!

★ Attempt to complete the game using 45 balls or less and you'll get both the best ending and a very special reward.

**PRESS D-PAD DIRECTION + TRIGGER
FOR HI-SPEED**

TIPS & CHEATS BY PRESSING KEYS

● OPENING SCREEN

Press & hold X + DOWN
Counter of balls used.

● BENNUGD SCREEN

Press & hold R-TRIGGER
Balls will be 2 times bigger.
