Jackpot Bells 5-10-25¢  
Four Reelers

PARTS FOR ALL MAKES OF MILLS MACHINES

PRECISION ENGINEERED, TESTED & FULLY GUARANTEED

ANTI-CHEAT DEVICES AND ATTACHMENTS ARE STANDARD EQUIPMENT ON ALL  
SERVICE GAMES MILLS BELL MACHINES

1. ESCALATOR ADVANCING BAR EXTENDED--Front plate and back plate cut back (making it impossible to "Boomerang" or "Shim" the escalator, putting the reels "on the pump", and draining the tube or setting the reels on a jackpot.)
2. BASE HOLE COVERED--Making it impossible to run a spring steel "L" against the push rod enabling a "cheater" to pump the tube empty or set the reels on a jackpot.
- \*3. NEW DESIGNED PAYOUT LEVER--This overcomes "shuffling" the slides. (Without this new feature a cheater can drain the tube in 20 seconds.)
- \*4. NEW ANTI-SPOONING DEVICE--If "spoon" is inserted, this device holds the "spoon" until machine owner (operator) releases it by setting machine on paying combinations.
5. ANTI-TIMING DEVICE ATTACHMENT--This attachment, on the clock, is considered the best by the operators who know "timing".
- \*6. ANTI-"4th CLICK JERK" DEVICE--This method of cheating a machine does not require "tools" of any kind and enables a "Cheater" to drain the tube and hit a jackpot in a matter of seconds.
- \*7. DRILLING AND RUNNING A WIRE IN THE MACHINE--This is not a source of revenue to a cheater on a "SERVICE GAMES MILLS MACHINE" ONLY, due to # 3, 4, and 6 above.

\* #3,4,6,7 above were designed by SERVICE GAMES technicians and are on ALL SERVICE GAMES NEW MILLS MACHINES. #1,2 and 5 are also STANDARD EQUIPMENT.
