## WHEN PLAYING BY USING THE CONTROL PAD

- Ⓐ Direction Controller
- Ⓑ START Button
- ① SHOOT button
- ② SHOOT button
- ③ Moves "THE ASTORO RAIDER"

### For 1 player

Aboard "THE ASTORO RAIDER", you must destroy the DEVIL STAR IMPERIAL FORCES single-handedly.

### For 2 players

Which one, you or your friend will be the first to save the SOLAR SYSTEM?

When "THE ASTORO RAIDER" is defeated, the other player takes his turn.

## HOW-TO-PLAY (TO THE AGGRESSIVE TYPE OF PLAYER!)

### PURPOSE OF THE GAME

THE DEVIL STAR IMPERIAL FORCES which established their advance base on the fixed star, "ALPHA KENTOWRY", located nearest to the Earth, have started to invade the galactic system. The SOLAR SYSTEM ALLIED FORCES have placed all of their hopes on their most gallant WARRIOR, who is now aboard "THE ASTORO RAIDER", ready to attack the invading army. You as the WARRIOR of the SOLAR SYSTEM ALLIED FORCES are about to get underway on a daring mission to destroy the enemy's space crafts, on your way to the ultimate target, the mother ship.

### GAME OVER

When starting the game, the number of allotted SPACESHIPS is 3. When all of them are lost, the game is over.

## STARTING

For one player, push the CONTROL PAD 1 START button.

For 2 players, push the CONTROL PAD 2 START button.  
(TO THE STRATEGIC TYPE OF PLAYER!)

## STARTING OFFENSE

THE DEVIL STAR IMPERIAL FORCES have a huge floating platform in addition to their fighting ships. A fortress on the platform must be destroyed in order to successfully advance forward.

- ① FORTRESS
- ② PLATFORM
- ③ "THE ASTORO RAIDER"

## POWER-UP

The enemy's spaceship quickly moves to attack you. In order to defeat it, an increase in power and weapons is required.

This is accomplished by individually capturing the WEAPONS SUPPLY SHIPS that appear during play. By obtaining these, you increase your speed and strengthen your firing ability. When they come into view, be sure to combine them and "THE ASTORO RAIDER" into one machine.

\*After the two are united, "THE ASTORO RAIDER" will be transformed into a new configuration.

## ATTACKING THE ENEMY'S ADVANCE BASE

The DEVIL STAR IMPERIAL FORCES' mother ship is a most formidable foe. Projectiles are fired from its 5 gun batteries. To destroy the ship, shoot at the batteries so as to keep them temporarily silenced. When hitting them with several shots, the enemy ceases firing at you. Obliterate them one after another.

When spending too much time in trying to attack this enemy, you put yourself in a very vulnerable position and can easily be destroyed.

## ADVICE FROM PROFESSOR PLAYOR

- In order to destroy the foe, be sure to increase "THE ASTORO RAIDER'S" fighting prowess ahead of time.
- Do not pursue the enemy's spaceships only. It is also important to demolish the platform fortress.

## THE MAGICAL CASTLE PIT POT GAME INSTRUCTIONS

### "THE MAGICAL CASTLE PIT POT" STORY

Deep in the PIT POT CASTLE, Princess Rommy is confined by a notorious sorcerer.

### IGUL, THE KNIGHT

A number of would-be heroes went into the castle with the aim of rescuing her, but no one ever returned alive because the entire castle is comprised of many confusing mazes and the monstrous creatures are always on the lookout. To destroy the evil enemies, the "sorcerer's hammer" is needed — fortunately, or unfortunately, IGUL, the knight, happened to pick up the hammer that the sorcerer dropped, and determines to enter the PIT POT CASTLE.

The PIT POT CASTLE is comprised of a number of rooms which are intricately connected by doors. In a certain room, the 3 treasures required for rescuing the princess are placed. Destroy the monsters with the hammer while breaking the castle floor or returning the broken portion to its original condition, and save the princess.

**PURPOSE OF THE GAME**

Using a hammer, try to break the blocks, return the broken blocks to their original condition, or destroy the monstrous creatures.

- Ⓐ Sacred purple water in a golden bottle. This removes the magical spell.
- Ⓑ The magical cross that seals off the witch's magical power.
- Ⓒ A ring that brings happiness.

To save the princess, find and collect all of the above 3 treasures and then go to the room where the princess is imprisoned.

#### GAME OVER

IGUL starts the game with the "water of life" in 2 bottles allotted (shown in the lower right portion of the screen). The game will be over in the following cases:

1. After all of the "water of life" contained in the bottles has been used and the last (3rd) player is lost.
2. When the player goes close to the princess without collecting all of the 3 treasures.

When taking a white bottle in which the golden "water of life" is contained, the number of "water of life" bottles increases.

### HOW-TO-MOVE IGUL

When the keys or the buttons are pushed, the hammer is raised, and when they are released, it is swung down.

NOTE: While the button used for hammering is kept pressed down, IGUL can not be moved.

- ① Door key
- ② Breakable blocks
- ③ Unbreakable blocks

Taking the door key enables you to open the door. However, even after capturing the key, sometimes none of the doors open. This is because the key has already opened a certain room's door which is not shown on the screen.

## VARIOUS WAYS TO DESTROY THE BLOCKS ...

Basically, there are 2 different kinds of blocks: the gray blocks which are breakable by using a hammer; and the yellow blocks which can't be broken with a hammer.

Each of the gray blocks is breakable with a hammer. There are some other ways to destroy the blocks as mentioned below:

### 1. Crushing the blocks at one time.

The gray blocks which are not connected with the yellow blocks will be broken at one time if the connecting block is destroyed. At this time, the monstrous creatures on the gray blocks will also meet their doom.

For example, when breaking the block as in (A), the (a) portion including the creatures on top of said portion, will also be entirely destroyed.

### 2. Block recovering technique.

This is the technique to restore instantaneously the once destroyed gray blocks to their original condition by hitting a certain yellow block.

## Key to proceed to the next room....

- Through the open door as in (B) above, you can go back and forth to the next room.
- To open any closed doors, capture the key for the door. Then, a certain door which is connected to an unknown room will open. Don't forget there is a door that can not be opened.

NOTE: Even if a door seems to be in a normal open condition as in (B), sometimes it is an one-way door and once entering, you can not come out of the room, so always keep this point in mind.

## TO CAPTURE THE TREASURES OR DOOR KEYS

- The treasures or the door keys can be captured when making contact with them. All of the required 3 treasures necessary to rescue the princess are stored in the (C) portion as described.
- Among the various treasures, some are hidden and do not appear on the screen or some are in the isolated blocks.

1. To locate the hidden treasures or keys:

① Destroy the block(s) which cause other blocks to fall together with it.

Ⓐ "Hey, I can't see anything!"

Ⓑ "Great! There's the key."

C

B

Ⓐ

Ⓑ

② Destroy the breakable block(s) and restore by hitting any yellow block.

Ⓐ "Heave-ho"

Ⓑ "The crystal ball appears!"

Ⓐ

Ⓑ

③ Try to tap an unbreakable block somewhere.

Ⓐ "Is it here I wonder?"

Ⓑ "Here it is!"

(A)

2. When the treasures and the key are located in an isolated place, etc., that can not be reached from where you are now:

① Try to take some other treasures.

(A) "We can't reach there."

(B) "Oh good! It's connected."

② Try the means mentioned in 1 above.

③ Try to go by a roundabout way.

Note: If by mistake, you have destroyed the treasure, then, don't be discouraged, as it will revive when you come in the room after once leaving it. However, the treasure once it is captured will not appear again, so pay attention to this point.

## RESCUING THE PRINCESS!!

#### ADVICE FROM PROFESSOR PLAYOR

As the LEVEL selected advances, the maze becomes more complicated and the number of rooms increases. Therefore, for your own information, you are advised to make a map showing the connections between the rooms. By referring to such a map you will be able to more easily proceed onward.
