ENTER THE WORLD OF ANCIENT GREEK MYTHOLOGY — RIDE PEGASUS TO BATTLE MEDUSA AND SAVE ARTEMIS, THE MOON GODDESS

TM

GAME STORY

Apollo, the sun god must rescue *Artemis*, goddess of the moon who has been abducted by the evil *Typhon*. With the help of *Pegasus*, the flying horse, *Apollo* journeys through a myriad of monster-infested worlds. Amongst the fierce creatures he confronts are *Geryon*, 3 old hags who share one eye, and the snake-headed *Medusa* with the power to turn the living into stone!!

GAME DESCRIPTION

PHELIOS has a novice and advance mode option and is played in seven stages. Each stage contains a succession of monsters and concludes with a formidable opponent, such as *Medusa* or *Charybdis*, the sea monster who guards *Typhon's* sanctuary. Players win after conquering *Typhon*, ruler of the underworld, in the seventh and final stage.

Apollo's weapon is the magic sword which fires destructive light beams. Players push the shooting button to fire, and can increase the intensity of the beam by continuing to

depress the button. The magic sword's power gauge appears on the right side of the screen.

During each stage players have chances to shoot golden owls. Hit one and it will turn into an object which can be picked up. These objects give players **extra powers** such as "additional firing power", "hyperspeed", "homing devices", "additional life" and "Phelios."

Phelios, the sword of light, is the key to the game's ultimate goal. Players need *Phelios*, the sword of light, to conquer *Typhon* in the last stage. *Phelios* is only available during this stage of the game.

GAME FEATURES

Listen to *God's* advice which appears at the bottom of the screen. His advice will help you defeat your enemies.

You can hear *Artemis's* cries for help and *Typhon's* hateful boasting.
