

PGA TOUR GOLF

HeartBeat Corp. 1994

SETTING UP THE GAME

1. Set up your HeartBeat system following the instructions in your owners manual.
2. Set the power switch of the Control Deck to OFF. Place the PGA TOUR GOLF cartridge into the game slot and press down firmly. Turn the power switch on. The Sega and HeartBeat logos should now appear.

GETTING INTO THE GAME

1. At the Pro Shop opening screen, select your player, or choose the player you wish to edit. Press **Button A**.
2. The **Edit Player** screen should appear:

To Do This:

- ♦Edit player's name
- ♦Change workout data
- ♦Save changes & start game

Press This:

- Select name & press Button A
Up/Down scroll letters. Left/Right scrolls cursor.
- Press D-pad Left/Right to scroll numbers.
- Select **SAVE EDIT** and Press Button A

3. Press **Button A** at the J-Box (processor) Updated screen to proceed.
4. Press **Button A** to open the category windows. Left/Right scroll through Play, Stats, Options. Up/Down will scroll through different choices of each individual window.
5. *To get right into a game select Play Golf under the PLAY menu.* Choose from 6 courses. Press **Button A** to proceed to an overhead view of the course and then to the Heart Rate Initialization screen. Follow the on-screen instructions.

***Note: If the HeartBeat system is ON, and you stop exercising for 15 minutes, without finishing a routine, the system will automatically restart.

TEST ALL MENUS, ALL OPTIONS...SEE WHAT THEY DO. IT'S EASY.

The Play screen is set up as follows (on screen Left to Right):

(a) Workout Display: *Warmup, Workout, Cooldown ♦ Time Countdown*
Target Heart Rate
Actual Heart Rate
HeartBeat Special Text Items

(b) Wind Display: Displays direction and MPH of wind.

(c) Power Bar: Shows you the maximum possible distance of your club chosen. You can hit the ball from 0% power to 100+% power, as shown below bar.

(d) Type of shot: Choose from Normal Shot (Drive, Putt), Chip Shot, Punch Shot.

(e) Hole Display:

<i>Hole #</i>	<i>Par</i>
<i>Stroke #</i>	<i>Score</i>
<i>Distance to Pin</i>	
<i>Club Selected</i>	

- ♦To aim the ball in a certain direction, move cursor at top of screen by pressing the D-Pad Left/Right.
- ♦To change clubs, press the D-Pad Up/Down. Notice as you change clubs, your maximum club power is changed.

HOW TO HIT THE BALL:

- ♦Button A gives you a view of your shot from the tee to the green.
- ♦When taking a shot, you will press Button B 3 times. Press Button B to start your swing, again to stop your back swing, and a third time to stop your swing.
- ♦When you start your swing, you'll see a white bar start from **left to right to left**.

♦♦♦IMPORTANT♦♦♦

- ♦For a straight shot, you must stop your swing as close to the accuracy point as possible. The accuracy point is the point from where you start your swing, located to the right of the 25% mark on the power bar.
- ♦For the best shot, take note of the wind, your club, and hit that accuracy point.

HEART RATE INTERACTION:

- ♦If you're working out too hard (above your maximum heart rate), the white swing bar will move twice as fast, decreasing your chance to hit the accuracy point.
- ♦If your not working out hard enough, your swing bar will only move 50% and your shot will most probably be hooked.

TO PAUSE THE GAME:

- ♦If you need to pause the game, press the **Pause Button** on the HeartBeat Processor. Doing so will also bring up a list of new window options.

Have Fun...HeartBeat Corp. (1-800-FUN-PLUS)
