SEGA SURE FIRE HITS!

LINE OF FIRE™

"This Time They've Gone Too Damned Far !"

Middle Eastern terrorists have developed the most powerful one man weapon yet to be devised - a weapon which, in the wrong hands, would wreak havoc on any country in the world. The terrorists have stolen the weapon and are holding it hostage in the most secure, multi-directional computer system known to man - from their high security 'fortress' camp. The other operations were Sunday picnics compared with this one. Getting in will be tough - getting out alive will be damned near impossible.
