

Victor OpenDev Talking Points

- Pre-purchase HUMANKIND™ on Steam or the Epic Games Store to gain access to the Victor OpenDev, or watch streams on Twitch with drops enabled to find an OpenDev code.
- In this OpenDev, you'll play from the Neolithic Era all the way into the Early Modern Era, like in the Lucy OpenDev. However, the Victor OpenDev features many improvements, a brand new map and a heavier focus on naval gameplay.
- Each culture within the eras will be playable, so you can explore as many culture combinations as you'd like between the periods.
- The Victor OpenDev ends when you hit either 150 turns OR the end of the Early Modern Era— whichever comes first.
- This is not a beta, demo or early access. The purpose of the OpenDev is to let you play a specific chunk of the game with a set map so we can gain feedback directly from you. This feedback will be used to help guide the rest of the development process.
- Once you're done with your playthrough, you'll be given a feedback form. Fill that out with reference to your time with the game, answering your questions as honestly as possible. This feedback will go directly to the development team.
- The Victor OpenDev will be available from **Thursday, April 22 to Monday, May 3**.
- HUMANKIND™ is set to release on August 17, 2021.

Elevator Pitch:

HUMANKIND™ is Amplitude Studios' upcoming historical 4X strategy game where you'll combine cultures throughout SIX different eras to become the most famous empire in history.
