## How To Play

 key of the KEYBOARD is the high speed button. While the button is pressed, the PACAR speed is accelerated.
- \* When reversing, the PACAR's speed is reduced to half its normal speed.
- \* The 30th, 60th, 90th and 120th dots which are deleted will be changed to special DOTS. After earning the special DOTS, the PACAR will be invincible and it will not be destroyed by the enemy car it crashes into, but on the contrary, will be able to destroy the enemy car. However, the special DOTS will disappear when they are passed over by the enemy car (blue).
- \* When the PACAR passes through a certain spot on the course, a red car appearing behind will closely follow the PACAR. Nevertheless, when the PACAR passes through the "warped" road displayed in the right and lefthand sides of the screen, the red car will disappear.
- \* When the PACAR crashes into the other car, PACAR loses.
- \* The number of PACARS for one game is 3 and one more car is added every time 10,000 points are scored as long as the number of such additional cars do not exceed 4.
- \* When all the DOTS on the screen are deleted, one scene is completed. Bonus points for each completed round are added to your score and you can proceed to the next scene.
