

INSTRUCTION MANUAL

EPILEPSY WARNING

WARNING: READ BEFORE USING YOUR SEGA VIDEO GAME SYSTEM

A very small percentage of individuals may experience epileptic seizures when exposed to certain light patterns or flashing lights. Exposure to certain light patterns or backgrounds on a television screen or while playing video games may induce an epileptic seizure in these individuals. Certain conditions may induce undetected epileptic symptoms even in persons who have no history of prior seizures or epilepsy. If you, or anyone in your family, has an epileptic condition, consult your physician prior to playing. If you experience any of the following symptoms while playing a video game: dizziness, altered vision, eve or muscle twitches, loss of awareness, disorientation, any involuntary movement. or convulsions, IMMEDIATELY discontinue use and consult your physician before resuming play.

WARRANTY

Tengen reserves the right to make improvements in the product described in this manual, at any time and without notice. Tengen makes no warranties expressed or implied, with respect to this manual, its quality, merchantability of fitness for any particular purpose.

If any defect arises during the 180 day limited warranty on the product itself (i.e. not the software programme, which is provided "as is"); return it in its original condition to the point of purchase.

Loading Instructions: Starting Up

- 1. Make sure the power switch is OFF.

For 1 Player: Press Start Button on Mega Drive Control Pad 1.

For 2 Players: Press Start Button on Mega Drive Control Pad 2.

- 1 Insert Mega Drive Cartridge
- Insert Mega Drive Control Pad 1.
- Insert Mega Drive Control Pad 2.

INTRODUCTION

This is world-class tennis.

From the practice courts to exhibition play, from Davis Cup competition to gruelling world championship matches for big money, Davis Cup Tennis offers every player the chance to grow from amateur to top seed. You can sharpen your skills with the Mega Drive as your tireless partner and instructor. You can play singles against a friend. Team up with the Mega Drive in doubles against a Mega Drive controlled opposing duo or play side by side with a friend in doubles against a

Depending on the kind of competition you choose, you can select the kind of court you play on and the number of sets in a match, and in every kind of competition you have your choice of beginner, amateur or professional skill levels.

Now hit the courts!

the Mega Drive.

CONTROLS

Use the direction pad on joypad 1 or 2 to select menu options, moving the highlight left, right, up and down as you wish. You can also use the up and down directions to move through 'pull-down' menus that appear during some phases of game set-up.

Press the A, B and C buttons to:
Confirm your selections from the top two
rows of the Main Menu

Select the type of court, number of sets and level of competition at the bottom of the Main Menu screen

Cycle through the roster of players you may choose to be (A and B) and go to the shot set-up menu (see 'Player Selection and Set-Up"), where you may assign various shots to each button.

Hit the ball (see 'On-Court Basics").

If you have a SEGA 6-button controller all six buttons are active and can be used to make specific kinds of shots (see 'On-Court Basics".)

Press START, when prompted, to begin play. In other instances you may also press START to return to a previous menu, or to bring up a pull-down menu at the upper left of the screen, for additional options.

ON-COURT BASICS

Movement and Racket Technique

The direction pad on your joypad moves your player around on the court.

To serve, press any button once to throw the ball up, then the button of your choice to hit the ball in the direction you want.

To volley, use the direction pad in conjunction with the joypad buttons. The left and right direction pad arrows are used to determine the direction of your shot. The kind of spin you put on the ball depends on whether you hit the ball before or after it bounces and which button you use, as follows:

With a 3-button joypad:				
Button	After	Before		
	a bounce	a bounce		
A	Flat shot volley	Normal		
В	Back spin/lob	Lifted volle		
C	Top spin	Drop shot		
Down + Á	Speed ball volley	Smash		
Down + B	Lob	Lift volley		
Down + C	Drop shot	Drop shot		

With a 6-b	utton joypad:	
Button	After a bounce	Before a bounce
Α	Flat shot	Normal volle
В	Back spin	Lifted volley
C	Top spin	Normal volle
X	Speed ball	Smash volle
Y	Lob	Lift volley
Z	Drop shot	Drop shot

As pressing the direction pad whilst pressing a joypad button affects the direction of each shot you make, you must move to the ball and "set yourself", releasing the direction pad before pressing it again whilst making your shot.

The shots described here are assigned to each button by the Mega Drive. You can assign the various shots to different buttons when customizing a player (see 'Player Selection and Set-Up.")

THE GAMEPLAY MENU

During gameplay, you can press START to bring up a menu in the upper left corner of the screen (this will also pause the action). Then, depending on the type of practice or play you are engaged in, you can use the direction pad and any joypad button to select one of the menu options:

Continue: Returns to practice or gameplay (you can also press START to resume play).

Statistics: Displays a table of statistics on

the current practice session or game.

Replay: Runs a replay of the last volley.

Contest: Contests an umpire's, line judge's or net judge's call.

Quit: Returns to the Main Menu.

Shown above these options on the pull-down menu is your current score.

THE MAIN MENU

From the title screen, press START to reach the Main Menu. It displays all your training, play and other options.

After choosing the kind of play you want, your final steps before starting are to pick the player you want to be and to set up your joypad the way you want it (see 'Player Selection and Set-Ub".)

You start your selections with the top row of choices in the Main Menu (from left to right) Training, Exhibition, Tournament, Davis Cup or Championship play.

Training Options

Choose Training to develop your skill on the court. When you do, your various Practice options appear in a second row on the menu.

Practice: An automatic service machine serves you ball after ball on the practice court. An inset image of your joypad in the upper right comer highlights your use of the joypad as you work on returning shots. The Mega Drive tells you when a serve or shot is out of bounds, so you can work on developing your eye and your sense of the court at the same time you improve your footwork and shot technique.

Precision: The automatic service machine serves you ball after ball on the practice court, with the inset image of your joypad highlighting your technique. In addition, the Mega Drive places a blue target arrow at various points around the opposite court so that you can work on placing each shot precisely.

Service: The Mega Drive gives you the blue target arrow whilst you work on your serve.

Speed: The machine volleys with you, moving the blue target arrow around the court with each shot, so you can work on going to the ball quickly and shooting accurately.

When you choose any of the first three training options, you may also choose the kind of court surface you wish to play on and the skill level at which you want to compete. Use the direction pad on your joypad to skip down to the following options, then press the A button to cycle through the choices to the one you want.

Court surface: Hard, indoors, clay and grass. Each kind of surface has unique characteristics that affect the players' speed on the court and way the ball behaves when it bounces.

Skill level: Beginner, amateur and professional.

When you choose Exhibition play, you will move down to the second row of the menu to choose Single or Double play. Then, in the third row you set up your match – in singles play, you versus the Mega Drive or another player; in doubles play, one or two players, playing against each other, each with the Megadrive as a partner, or playing together against the Mega Drive.

Finally, you choose the type of court surface you want and the skill level. In exhibition play, you also get to choose the number of sets you want to play in a match -1,3 or 5 from the bottom row of the menu. Press any button to cycle through your choices.

TOURNAMENT

In Tournament play you choose singles or doubles. If you choose singles play you must then choose whether you want to play against another player or against the Mega Drive. For doubles, you must choose whether you want one or two players, playing against each other, each with the Mega Drive as a partner, or playing together against the Mega Drive.

Finally, you choose the court surface, number of sets and skill level.

When finished, press START. You will see an elimination chart which shows you the extent of the competition you are involved in, and who your opponent will be in the match at hand. Use the direction pad to scroll the chart around the screen. When you have finished viewing the chart, press START.

Starting a Match

When you and your opponent appear head to head on the screen, you have a chance to check how your player is set up and make any adjustments you want. Press the C button to see 'Player Selection and Set-Up', then make any adjustments to your shot controls. When finished, press START.

Now you toss a coin to serve. Use the direction pad to select heads or tails, then press any button. You will then go to the courts to begin play.

After a Match

When a match is over you will see a statistics screen that summarizes the performance of each player in the match. Press any button and you will see the elimination chart, which now reflects the results of the match. If you have quit before a match is complete, the chart will show the results of the entire tournament.

DAVIS CUP

Davis Cup tennis is a classic international competition where leading countries send their best players onto the courts for uncompromising singles and doubles play. Singles and doubles matches alternate with each other automatically, so your only selections are what kind of match you want to play – one or two players, playing against each other, each with the Mega Drive as a partner or playing together against the Mega Drive – and the number of sets and skill level you desire.

See "Tournament" for details on getting set up for a match, starting play and what happens after each match. The procedures are the same, except that in Davis Cup competition the Mega Drive always shows you the next match-up at the end of the match.

CHAMPIONSHIP

Championship competition gives you a chance to live the life of the worldclass tennis pro. You travel the globe, playing on many of the classic courts of the world. Each match you are offered carries a certain amount of prize money, but each has costs associated with it as well. Your goal of course, is to win as much prize money as you can. So you will have to choose your matches and opponents carefully.

After choosing Championship play and specifying the skill level at which you want to compete, you must select and set up your player – see 'Player Selection and Set-Up". After setting up your player, you press START. You start in your own country where you are informed that your sponsor, Tengen, has offered you a \$20,000 bonus to get started on your championship career. Press START again.

The Championship Pop-Up Menu

While you are in your own country, you can press any joypad button to bring up the championship pop-up menu. Use the direction pad and the A button to select from the menu:

Go to Next Week: This enables you to skip ahead a week at a time in championship competition.

Exit: Leaves championship play and returns to the Main Menu.

Input Password: You get to enter a previously assigned password to resume championship play.

Get Password: You are assigned a password for the current state of play, so you can resume championship play at a later time, see 'Input Password" option.

Continue: Clears the pop-up menu.

The World Map: Selecting a Match

Here you can survey your choices and select your next match. Use the direction pad to move from place to place.

The exact match and prize money offered in each place will vary from week to week, depending on each player's skill level and record.

(Though it will cost you a little money and you can't win anything while you are there, American Training Camp in the western U.S. is recommended for beginners, or just when you think your skills might be a little rusty. Camp is just like the Practice option on the Training menu).

Championship Play

Procedures for getting set up for a match, starting play and what happens after each match are the same as in Tournament and Davis Cup competition – see those sections of the manual for details.

PLAYER SELECTION AND SET-UP

When you are setting up for practice or gameplay, the player selection and set-up screen appears with either one, two or four players appearing – depending on the kind of match you are getting ready for. The procedures for selecting and setting up the shot controls for each player are the same. Press A or B to switch through the roster of

available players. For each player, his nationality and rank are displayed.

To check and adjust the shot controls for the selected player, press C.

Use the direction pad to scroll through the three types of shots (six shots if you have a six-button joypad), and press the joypad buttons to assign them to each type of shot. Remember, the joypad buttons work in conjunction with the direction pad when you are volleving—see 'On-Court Basics'

HANDLING THE MEGA DRIVE CARTRIDGE

The Mega Drive Cartridge is intended exclusively for the SEGA MEGA DRIVE SYSTEM.

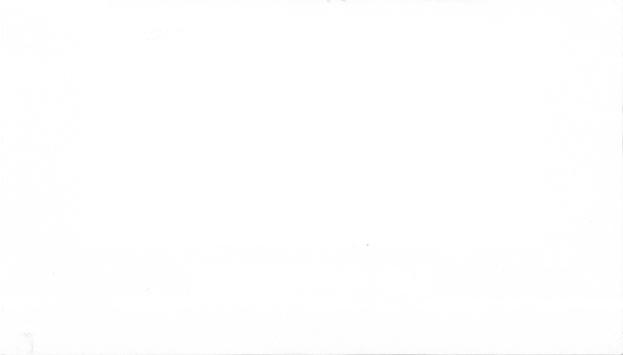

For Proper Usage

- Do not get wet!
- 2. Do not bend!
- 3. Do not subject to any violent impact!
- Do not expose to any direct sunlight!
- Do not damage or disfigure!
- 6. Do not place near any high temperature source!
- 7. Do not expose to thinner, benzine, etc.!
- v When wet, dry completely before using.
- When it becomes dirty, carefully wipe it with a soft cloth dipped in soapy water.
- v After use, put it in its case.
- Be sure to take an occasional recess during extended play.

WARNING: For owners of projection television. Still pictures or images may cause permanent picture tube damage or mark phosphor of the CRT. Avoid repeated or extended use of video games on large screen projection televisions.
