IS IT A GAME... OR IS IT REALITY? IT'S A WHOLE NEW DIMENSION OF FUN FROM SPECTRUM HOLOBYTE.

Spectrum HoloByte is continuously exploring technologies that make our games more realistic, more challenging and more fun. Our new *National Lampoon's Chess Maniac 5 Billion and 1* and *Star Trek: The Next Generation* games feature 3-D animation so vivid, the figures practically reach out and grab you. The heart-stopping *Iron Helix* is our latest offering on CD-ROM that pulls you into the chillingly real world of virtual reality. Too sinister? Throttle back with titles from our new line of sports games, *David Robinson NBA Action* and *Joe Montana NFL Football*. Hear the roar of the crowds, feel the pressure of calling the next play.

THE BEST GAMES ON THE MOST POPULAR PLATFORMS

We're committed to creating games for the most popular and most advanced PC and videogame platforms, including 3DO, Sega Genesis and Super NES. And we're currently working on an exciting new virtual reality project.

GO HEAD-TO-HEAD WITH THE BEST

There's only one thing more exciting than pitting your skills against a Spectrum HoloByte game, and that's pitting them against a real-life opponent. Most of our games feature head-to-head competition against your friends across the room or across the country. Connect the same or even different games by direct connect, modem or network.

The real world was never this thrilling, this scary or this much fun.

About our cover:
