

# GD-ROM SYSTEM

## for NAOMI™ NAOMI™ 2

Step up from "Naomi" to "Naomi GD-ROM SYSTEM" and then to "Naomi 2"

This is a revolution in the Arcade Business with the most advanced technology and an original operation strategy to suit every operator.

Sega introduce the supply of arcade video games by "GD-ROM"  
This is the birth of new distribution system for coin-op video games by connecting the "Naomi GD-ROM system" to "Naomi".  
Make your operations more profitable by use of this New system, which has been brought to you by Sega's continued research and development and experience.

Use the advantages of this system to the benefit of your arcade business.

**Advantage 1:** Reduce the investment and risk

**Advantage 2:** Provide high-quality game to the players

**Advantage 3:** Do not miss the chance of maximizing the good games, by benefiting from shortened lead times for repeat purchases.

## Supply games by GD-ROM

The distribution of GD-ROM format will establish "A revolution in your repeat orders strategy".  
Games can be manufactured in as small or large a quantity as you desire and within much shorter lead times, giving both manufacturer and distributor much greater flexibility. Operators will also benefit by shorter lead times for repeat orders.

Improved performance with the very latest developments in technology.

Naomi 2 brings new power and even better graphic quality. It is compatible with Naomi GD-ROM system and also previous Naomi games could be used on the "Naomi 2" (down compatible).
