## objective

Colored shapes appear randomly along the grid, and move toward the center. You must eliminate them (remove them from the grid) before they enter the Center Square. Pressing the A, B or C Button will fire (figure 1). If you strike a shape that is the same color you are, that shape will be eliminated (figure 2). If you strike a shape of a different color, you will exchange colors with that shape and the shape will remain on the grid (figure 3).

If you eliminate enough shapes, you will move to the next stage and the play intensity will increase.

When the colored shapes are about to enter the Center Square, the dots in the Center Square will flash and a warning will sound. If the colored shapes enter the Center Square, the game will end.

**Hint:** For higher scores and faster shape removal, eliminate multiple shapes at one time. Change the first in a row/column to match the shapes behind it – then **Zoop** them all at once.

## power-ups

As you play **Zoop**, Power-Up Icons will randomly appear on the grid along with the colored shapes. If you strike a Power-Up, it will assist you in eliminating other shapes.

**Proximity Bomb:** Eliminates all the shapes touching the first shape you hit.

**Line Bomb:** Eliminates an entire row of shapes regardless of color.

**Color Bomb:** Eliminates all the shapes in a quadrant that are the same color as the first shape you hit.

**Bonus Spring:** Collect five of these to clear all the shapes on the grid.

If a Power-Up or Bonus Spring reaches the Center Square, it will disappear. Power-Up and Bonus Spring will not end the game.

# level or continual play

Each time you start a game, you have the option of playing a Continual Game or a Level Game. In a Continual Game, once you eliminate enough shapes to move to the next stage, the background will change, and the speed at which shapes appear will increase, but current shapes remain on the grid. In a Level Game, once you eliminate enough shapes, you will move to the next level with no shapes on the grid. (**Note:** At higher difficulty levels, there will be shapes on the grid.)

Press Up & Down on the D-Pad to select **CONTINUAL**, **LEVEL** or **OPTIONS** then press any button to continue.

## options

In this screen you can turn the game sound and music on or off.

Press Up & Down on the D-Pad to select **SOUND** or **MUSIC**, then press Left or Right to turn that feature on (+) or off (-).

Press Up & Down on the D-Pad to select **EXIT** and press any button to continue.

## stage select and difficulty

### STAGE

Using the Stage Select dial, you can select 1 of 9 stages on which to begin gameplay. The speed at which shapes appear on the grid increases as you advance from stage 1 to stage 9.

Press Left or Right on the D-Pad to rotate the stage numbers so that your desired starting level is highlighted in white at the top of the square.

### DIFFICULTY

**Level Play:** If a difficulty of 1-4 is selected in Level Play, each new stage will begin with colored shapes already on the grid. The level of difficulty selected will determine the number of colored shapes already on the grid at the start of each stage.

**Continual Play:** The level of difficulty selected will determine the number of colored shapes already on the grid at the start of the game.

Press Up & Down on the D-Pad to select **DIFFICULTY**, then press Left or Right to increase or decrease the Difficulty Level. Press any button to continue.
