Please ask any question at:
Kiyo / Don Campbell (Tech. of SEGA AMUSEMENTS U.S.A. Inc. (Phone: 1-847-364-9787)

STOP / IMPORTANT
Handling the GD-ROM Disk

- Do not contaminate the disks with your fingerprints or dust particles. Contaminated disks may lower audio and video quality.
- When cleaning the disks, do not use volatile chemicals (benzine, thinner, etc.), cleaning sprays, and antistatic agents.
- Do not use cracked, warped, or damaged disks.
  Do not attach papers or seals onto the disks; do not scratch the disks.
  Do not use the disks with a sign of peeled seals, tapes, etc. Observing these instructions, do not insert such a non-usable disk into the GD-ROM drive. Otherwise the inserted disk can not be ejected.
- When cleaning a heavily contaminated disk, use clean cloth that has been soaked in water and squeezed. Then remove moisture with dry cloth.
- When holding a disk, be careful not to contaminate it with your fingerprints.

Use clean cloth to wipe the disk gently into a radial direction.

How to Hold a Disk

With both hands:
Put your thumbs and forefingers of both hands on the disk's 4 edges.

With one hand:
Insert your forefinger into a central hole and at the same time put your thumb and middle finger on the disk's 2 edges.

How to Attach

① Remove the 1 truss head screw that fixes the GD-ROM drive lid (DISC LID). And turn clockwise the lid to remove.

② Take out the GD-ROM disc from its case, and set it onto the GD-ROM drive with a labeled side facing you.

③ Return the lid to its original place, and fix it with 1 truss head screw. Be careful not to fasten it too tightly.

How to Detach

① Remove the 1 truss head screw that fixes the GD-ROM drive lid (DISC LID). And turn clockwise the lid to remove.

② Take out the GD-ROM disc and store it in the case. In this instance, be careful not to touch its grooves where the data is stored.

③ Return the lid to its original place, and fix it with 1 truss head screw. Be careful not to fasten it too tightly.
