(54) **Game apparatus, game processing method, and recording medium**

(57) A game apparatus, requiring certain operations of a player within a time limit, which displays a window (W1) wherein operations by the player are possible and which gradually changes the display mode of the window as time passes. The said window may display a plurality of choices that can be selected by the user and the change in the display mode comprises a gradual change in the choices displayed in the window. A corresponding game processing method, requiring certain operations of a player within a time limit, displays windows which can be operated by a player and gradually changes the display mode of the window as time passes. A recording medium has recorded thereon a game processing program adapted to execute the game processing method when read by a computer.
