BURNIN' DOWN THE HIGHWAY!

"It shouldn't come as a great surprise to anyone that I found Daytona to still be the most universally popular game even after being in the arcades for close on two years. Nearly all (the gamers) that I talked to spoke of the realism of the game and graphics as being the deciding factors. Operators also referred to Daytona with a reverent tone... 'Daytona's popularity is unprecedented.'"

Cashbox International Magazine, September 1996.

There has never been another game like it. Daytona USA has blown away every driving simulator ever created. It's success has been unparalleled. Operators rave over the game's consistently high earnings and gamers love the full speed racing action that keeps them coming back again and again!

Sega is now offering **DAYTONA USA LIMITED EDITION**. This limited edition unit features the world's most popular racing game in a new Single Player Sit-Down Cabinet!
