Important: Safety information about video games

About photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause photosensitive epileptic seizures while watching video games. These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Adults who allow teenagers (or children) to play the games should watch for or ask their children about these symptoms as they are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by playing in a well-lit room and by not playing when you are drowsy or fatigued. If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

Play safely

Take a break from playing games at least every half hour. Stop playing immediately if you begin to feel tired or if you experience an unpleasant sensation or pain in your hands and/or arms. If the condition persists, consult a doctor. Use of vibration can aggravate injuries. Do not turn vibration on if you have any ailment in the bones or joints of your fingers, hands, wrists, or

CARE AND MAINTENANCE

Your game card and game deck are products of superior design and craftsmanship and should be treated with care. The suggestions below will help you protect your warranty coverage and enjoy your game for many years.

- Keep the game card and game deck dry. Precipitation, humidity and all types of liquids or moisture can contain minerals that will corrode electronic circuits.
- Do not use or store the game card and game deck in dusty, dirty areas.
- Do not store the game card and game deck in hot areas.
- Do not store the game card and game deck in cold areas. When the game deck returns to its normal temperature, moisture can form inside the game deck and damage electronic circuit boards.
- Do not attempt to open the game card or game deck other than as instructed in the user guide.
- Do not drop, knock, or shake the game card and game deck.
- Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the game card or game deck.
- Keep the game card out of the reach of small children.

All of the above suggestions apply equally to your game card, game deck, and any enhancement.

GAME PLAY

Puyo Pop is a game of fast-action falling beans which requires skill and timing. The beans must be moved so that your playing field does not fill up before your opponent's.

There are 5 colours of beans in the game: red, violet, green, yellow, and blue. Although the beans fall in random pairs, each player receives the same combination of pairs during a game.

Press 5 (دائري) to rotate beans clockwise, and press 7 (مربع) (or Up on the Controller key) to rotate them counter-clockwise. Use the Controller key to move the beans left (←) or right (→). To execute a quick drop down, press Down on the Controller key (↓). Connect four or more beans of the same colour and they disappear from the playing field. *HINT:* Score extra points (in some modes) by making chain reactions where several sets of beans disappear in sequence.

Stage 1 of 2-Player Scenario mode

1-PLAYER

In 1-Player, you may choose from three different selections – Scenario, Exercise and Puzzle – as you advance in each, the difficulty will increase. There are a total of 12 different AI opponents.

Level 1 of 1-Player Exercise mode

2-PLAYER

Puyo Pop uses Bluetooth technology to enable you to search for other players in your area. Once you find another player and your challenge is accepted, you can begin your live, head-to-head game!

It's easy to set up a 2-Player game. Follow the directions specified in your N-Gage game deck for enabling the Bluetooth feature and assigning a Bluetooth Name to your device.

After completing the above step, both players must start by selecting “Start game” and then “2P Bluetooth”.

Next, Player 1 selects "Start new game". The "Waiting for game" screen will then appear.

Player 2 selects "Connect to game". The "Connect to game" screen will appear and the device will begin searching for other devices within range. When searching is complete, a list of local Bluetooth-enabled devices will appear, and Player 2 must select the Bluetooth Name that matches his/her preferred opponent (Player 1).

Once Player 2 selects an opponent, the message "Contacting host" will be displayed on their device. Player 1 will then receive the message "Client contacted verifying game", and Player 2 will be taken to the "Game accepted/Press key to start" screen. Player 1 may then select "OK" to begin the game, or "Cancel" to abort the game.

If either player selects "Pause", the game will pause on both systems. Only the player that originally hit "Pause" can resume the game.

If the players move out of Bluetooth range, or there is radio interference, the connection may be lost and the game will pause. At this point, the players will be prompted to move closer together and the devices will automatically try to re-establish the connection and resume gameplay.

PAUSE THE GAME

During any game mode, the game may be paused by pressing the right or left selection key. A "Game paused" menu screen will appear. "Game paused" menu selections are as follows:

Resume

Resumes the game.

Options

Sound and Backlight can be modified to your liking (also accessible from Main Menu).

Restart

(stage/level/puzzle) Restarts stage, level or puzzle at the beginning.

End game

Ends the game mode you are playing. A prompt appears: "Are you sure you want to exit?" Select either "Yes"  to return to "Start Game" menu screen or select "No"  to return to "Game paused" menu screen.
